

## 4. Completed Works

Currently we have completed the full UI including every userflow, complete authentication module, 4CRUDS by each group member. This workload covers roughly about 45% present for the entire workload.

### 1.1 Note Management Module (Member 01)

- 1.1.1 UI Development

- Design and implement Note Library view
- Implement Note Creator view
- Implement Note Viewer view
- Sharing & Deletion flows

- 1.1.2 Database Design

- Define tables: `note`, `subject`, `note_shared`, `note_tag`
- Create, edit, delete view notes.

- 1.1.3 Controller Development

- Implement endpoints: `openNote`, `createNote`, `deleteNote`, `updateNote`

### 1.2 Q&A Module (Member 02)

- 1.2.1 UI Development

- Question Forum

- Question Viewer

- Answer Creator

- **1.2.2 Database Design**

- Tables: **question**, **answer**, relations (**votes**, **user\_question**, etc.)

- **1.2.3 Controller Development**

- **QandAController**: createQuestion, editQuestion, deleteQuestion, viewQuestion

## **1.3 Exercise Module (Member 03)**

- **1.3.1 UI Development**

- Exercise Creator, Attempt View, Results View

- **1.3.2 Database Design**

- Tables: **exercise**, **exercise\_question**, **user\_exercise**, **attempts**

- **1.3.3 Controller Development**

- Create, edit, delete, view exercise.

## **1.4 Analysis & Utility Modules (Member 04)**

- **1.4.1 Analysis & Reporting**

- UI for analysis page.

- **1.4.2 Notifications**

- Notification Module implementation.
- Notification panel in navbar.

- 1.4.3 Authentication

- Log in
- Register
- Update Password
- Access control
- Session management

- 1.4.3 OTP module

- OTP module implementation
- Integrate with the authentication module. 1.4.4

### **Profile Management**

- Edit profile
- Delete Profile
- Set up Profile
- Ban profile

- 1.4.5 Expert role request

- Send request ○ edit/delete functionalities.
- Accept, reject functionalities.

## *1.6 Documentations*

- **Documentations.**

- Project proposal
- Interim report
- System Diagrams
- Slides for presentations.

## 5. Work to be completed

### 1.5 Advanced Text Editor (All Team)

- UI for the text editor
- Implement functionalities (stylizing the text, add images, link resources, etc.)
- Add custom code segments and math expressions
- Integrate with system modules
- Test and debug

### 1.1 Note Management Module (Member 01)

#### *1.1.1 UI Development*

- Sharing & Deletion flows
- Advanced text editor functionalities
- Implement structure for notes (users can structure notes hierarchically, similar to a file system)

#### **1.1.2 Database Design**

- Implement models & CRUD methods for note structure

#### *1.1.3 Controller Development*

- Implement endpoints: share notes

- Endpoints: createFolder, deleteFolder, openFolder

## 1.2 Q&A Module (Member 02)

### *1.2.1 UI Development*

- Question Forum
- Question Viewer
- Answer Creator
- Advanced text editor for creating questions and answers

### **1.2.2 Database Design**

- Tables: question, answer, relations (votes, user\_question, etc.)

### *1.2.3 Controller Development*

- **QandAController:** createAnswer, edit/deleteAnswer, voteQuestion, voteAnswer
- **QandAAdminController:** banQuestion, banAnswer

## 1.3 Exercise Module (Member 03)

### *1.3.1 UI Development*

- Exercise Creator, Attempt View, Results View
- Edit, delete, view flows for creator

### **1.3.2 Database Design**

- Tables: exercise, exercise\_question, user\_exercise, attempts

#### *1.3.3 Controller Development*

- CRUD + attemptExercise + viewResults
- Vote exercises, edit, delete exercise
- Mark calculations

### 1.4 Analysis & Utility Modules (Member 04)

#### *1.4.1 Analysis & Reporting*

- UI for analysis page
- Controller method for retrieving and manipulating data

#### *1.4.2 Notifications*

- Notification module implementation
- Notification panel in navbar

#### *1.4.3 Authentication*

- Log in
- Register
- Update password
- Access control
- Session management

## 1.6 Documentations

- Documentations
- Final documentations
- Slides for presentations

# 6. Overall work breakdown

## 1.1 Note Management Module (Member 01)

### 1.1.1 UI Development

- Design and implement **Note Library** view
- Implement **Note Creator** view
- Implement **Note Viewer** view

- Implement Sharing & Deletion flows

#### *1.1.2 Database Design*

- Define tables: `note`, `subject`, `note_shared`, `note_tag`
- Implement models & CRUD methods

#### **1.1.3 Controller Development**

- Implement endpoints: `openNote`, `createNote`, `shareNote`, `deleteNote`, `updateNote`

### 1.2 Q&A Module (Member 02)

#### *1.2.1 UI Development*

- Question Forum
- Question Viewer
- Answer Creator

#### **1.2.2 Database Design**

- Tables: `question`, `answer`, relations (`votes`, `user_question`, etc.)

#### **1.2.3 Controller Development**

- **QandAController:** `createQuestion`, `answerQuestion`, `deleteAnswer`
- **QandAAdminController:** `banQuestion`, `banAnswer`

## 1.3 Exercise Module (Member 03)

### 1.3.1 UI Development

- Exercise Creator, Attempt View, Results View

### 1.3.2 Database Design

- Tables: `exercise`, `exercise_question`, `user_exercise`, `attempts`

### 1.3.3 Controller Development

- CRUD + `attemptExercise` + `viewResults`

## 1.4 Analysis & Utility Modules (Member 04)

### *1.4.1 Analysis & Reporting*

- UI for analysis page
- Controller method for retrieving and manipulating data

### *1.4.2 Notifications*

- Notification module implementation
- Notification panel in navbar

### *1.4.3 Authentication*

- Log in
- Register

- Update password
- Access control
- Session management

#### *1.4.4 OTP Module*

- OTP module implementation
- Integrate with the authentication module

#### *1.4.5 Profile Management*

- Edit profile
- Delete profile
- Set up profile
- Ban profile

#### *1.4.6 Expert Role Request*

- Send request
- Edit/delete functionalities
- Accept/reject functionalities

### 1.5 Advanced Text Editor (All Team)

- UI for the text editor

- Implement functionalities (stylizing the text, add images, link resources, etc.)
- Integrate with system modules
- Test and debug

## 1.6 Documentations

- Documentations
- Project proposal
- Interim report
- System diagrams
- Final documentations
- Slides for presentations
